Work Experience

Sales Associate - Staples **May. 2019 – Sep. 2019**

- Assisted customers by understanding and helping them with store products selection.
- Performed front-end responsibilities such as cashier, return, and online orders.
- Worked in the technology department performing printing, tech products, and computer sales.

Tech Assistance – Wilbert's Tech Help **Jan. 2016 – May. 2018**

- Assisted customers performing installation of software and screen replacement of electronic products such as tablets, phone, and computers.

Academic Projects

House Face (Personal Project): **Sept. 2019**
Created a web application with HTML, CSS/Bootstrap, JavaScript/jQuery which contains nine pads with House music samples. The users can interact with it and create their own music.

Movie Data Search (CSC110, URI): **May. 2019**
Developed a Python programming project that reads movies from an external file where the user can sort all lists by the runtime, find a movie by a certain genre, title, ranting, longest film made, average runtime by given year range, and writes the results to a output file.

Frogger World Tour (CS116, URI): **Dec. 2018**
Co-developed a JavaScript game called "The Frogger World Tour." The user could select one of the three characters, try to avoid obstacles, and pass the three world levels to win the game.
